 Kazan, Russia

 harryof

Summary

Frontend Developer (React / TypeScript) with commercial experience in building, scaling, and maintaining web applications. Specialized in developing robust SPAs from scratch using React, TypeScript, and Tailwind CSS, integrating REST APIs, and optimizing interface performance (Core Web Vitals). Experienced in agile team environments and Git-flow using GitLab/GitHub. Focused on writing clean code and solving business-driven tasks.

Education

09/2022 – 06/2026
Kazan, Russia

Bachelor, Kazan Federal University (KFU)
Applied Informatics (Frontend Development)

Skills

Frontend:

- React.js,
- TypeScript,
- JavaScript (ES6+),
- Tailwind CSS,
- Vite,

Backend & DB

- Node.js
- PostgreSQL
- REST API

Tools

- Docker
- Git
- GitHub
- GitLab

Languages

English

B2 (Upper-Intermediate)

Russian

German

A2 (Elementary / Basic)

Courses

2024

Yandex Practicum, *Yandex*

2023

Frontend Developer, *Айтилогия*

2025

Web Developer, *Innopolis University*

Projects

Real Estate Platform — Triatrum.ru (Commercial Project) , Frontend - developer

- Developed the entire client-side architecture of the service from scratch based on Figma design layouts. \
- Established frontend structure and ensured seamless integration with REST APIs in close collaboration with Go backend developers.
- Managed and automated production code delivery workflows using GitLab CI/CD pipelines.
- Interacted directly with the client to conduct design audits and rapidly implement UI/UX adjustments based on business requirements.

- Providing continuous technical support and scaling for the live production application.

Stack: React, JavaScript, CSS Modules, Go (REST API), Figma, GitLab CI/CD

Auto Parts E-Commerce Platform with AI Consultant (Diploma Project), Fullstack / Frontend - developer

- Designed the UI/UX and developed a full-stack e-commerce MVP application completely from scratch.
- Built the frontend interactive layout and real-time chat interface using React and TypeScript. Integrated GigaChat API to build an autonomous, context-aware digital consultant that automates customer support and filters product offerings via user queries.
- Developed server-side parsing logic for vehicle VIN-code decoding to dynamically cross-reference specifications and fetch exact matching components from a PostgreSQL database.
- Containerized the application for smooth deployment.

Stack: React, TypeScript, Node.js, PostgreSQL, GigaChat API, Docker, Git

P2P Marketplace — ArendOK.ru (Commercial Project) , Frontend - developer

- Responsible for the complete development, delivery, and support of the platform's client-side interface.
- Transformed complex UI/UX wireframes from Figma into clean, cross-browser, and highly responsive code using React.
- Engineered the frontend component architecture, ensuring fast page load speeds and maintaining strict data typing via TypeScript.
- Actively participated in team syncs and managed codebase updates within a strict Git-flow.
- Currently handling ongoing technical support and UI adaptations for new feature rollouts.

Stack: React, TypeScript, JavaScript, Tailwind CSS, CSS Modules, Figma, Git, GitLab
